Collagen, a vital natural protein present in our skin. Its presence, confers skin's strength and elasticity. As one ages, the amount of collagen fibres decreases due to everyday exposure to UV rays and oxidants, resulting in wrinkles formation and saggy skin. Therefore, Collagen holds the key to "youthfulness and beauty". Collagen Injections in Plastic Surgery is also common to reduce creases, lines and wrinkles and to plump up facial features including the cheeks and lips. However, these could be prevented by constantly replenish the amount of collagen by performing regular facial treatment when you're young.
